

# Presentation Brainstorming Activity

Think of at least three general areas of interest you have. For each of these areas, think of five topics you could do a presentation about.

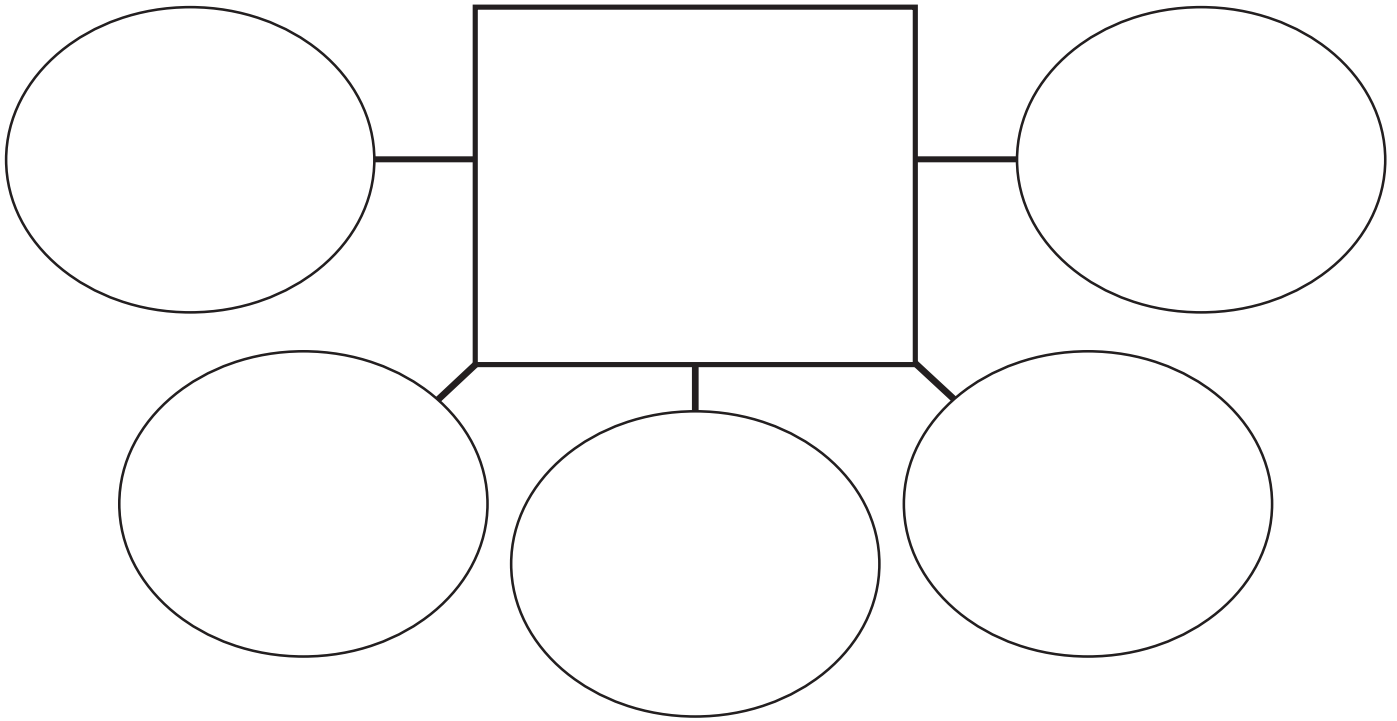

## Example

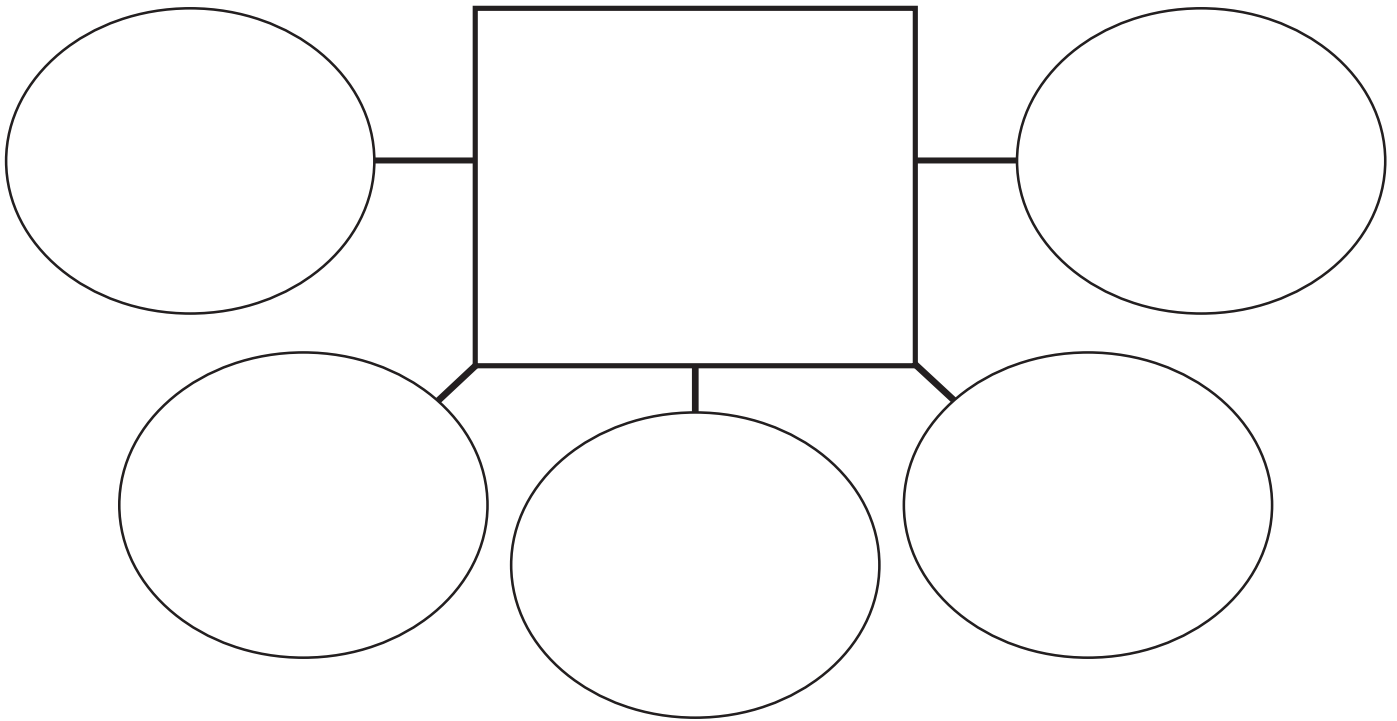

## Possibility I

Possibility 2

Possibility 3

Choose several of your favorite topics from your brainstorming possibilities. Then list subheadings or main ideas you could talk about on that topic. Write ideas for visual aids you could use. (If you can't think of any, maybe you could give a public speech on the topic.)

When you are done, look over all of your ideas. Determine what type of presentation would be best for that topic. Finally, choose the one that interests you and that has several subheadings you can talk about. Preparing your presentation will now be easy.

### Examples

Topic Idea	Topic Idea	Topic Idea
Hamsters	Making Smoothies	Equine Euthanasia
Subheadings/Main Ideas	Subheadings/Main Ideas	Subheadings/Main Ideas
1. Types of hamsters	1. Nutrition	1. Why you would do it
2. Housing and bedding	2. Recipe	2. Methods
3. Feed and water	3. Ingredients	3. How to decide
4. Grooming	4. Show how to make one	4. My experience
5. Showing	5. Food safety	5. Who to talk to
What visual aids could I use?	What visual aids could I use?	What visual aids could I use?
Hamster	Blender	Not sure; pictures might be too disturbing
Cage/bedding	Ingredients	
Toys	Cool cup	
Food	Recipe	
This would make a good	This would make a good	This would make a good
illustrated talk because there are several ideas to talk about, it is educational, and there are interesting visuals to use.	demonstration because there is a step process I can demonstrate and there will be a finished product to share.	public speech because there are no visuals, I can share a personal story, and I can encourage the audience to react.
